If this type of open, flexible and challenging work environment appeals to you, we encourage you to apply for the position of **DRM Software Engineer**.

JOB DESCRIPTION:

Findaway World is looking for a Software Developer focused on content security to join our energetic team. You will be working on the Product team and helping build and secure our next generation products. Findaway is a young, profitable company in NE Ohio with a Silicon Valley feel. We value our team and encourage creativity and ownership.

REQUIREMENTS (Must have to be considered):

- 5+ years C/C++ experience
- Knowledge of content security best practices, trade-offs, pitfalls and implementations
- Hands-on content security and DRM experience and implementation in a professional environment
- Highly driven, self-motivated, with a strong desire to build and deliver secure mechanisms to consume and acquire content

EXPERIENCE/QUALIFICATIONS:

- Experience with C/C++, HTTP, TCP/IP, UDP, RSA encryption
- Experience with securing streaming content is a plus
- Experience with internet a web service development and consumption
- Comfortable working in a fast paced development environment
- Strong Object Oriented Programming skills and systems architecture experience

Think you've got the stuff? Please submit your resume to hr_resumes@findawayworld.com for consideration.
