If this type of open, flexible and challenging work environment appeals to you, we encourage you to apply for the position of **UI/Front End Developer**.

## **JOB DESCRIPTION:**

Findaway World is looking for an UI / Front End Developer to join our energetic team. You will be working on the Product team and helping build our next generation product. Findaway is a young, profitable company in NE Ohio with a Silicon Valley feel. We value our team and encourage creativity and ownership.

- Designing the user interface and experience for new applications and sites in tandem and partnership with back end service developers, as well as enhancements to existing mobile architecture.
- Leveraging your understanding of UI/UX design principles and best practices, device-side application development, and web front end technologies.

## **REQUIREMENTS:**

- 1-3+ most recent years' experience focusing on UI/Front End JavaScript Development including JavaScript Frameworks.
- Experience developing with one or more of the following JavaScript Libraries: jQuery/jQuery UI, YUI/YUI 2, ExtJS, MooTools, Prototype, JSON, Dojo, DWR, GWT and/or Scriptaculous.
- Experience user interface and experience for very high volume customer facing internet sites or mobile apps.
- Able to employ front end optimization techniques.
- Experience working with Flash and Adobe Creative Suite.

## **EXPERIENCE/REQUIREMENTS:**

Think you've got the stuff? Please submit your resume to [hr\\_resumes@findawayworld.com](mailto:hr_resumes@findawayworld.com) for consideration.
